REMARKS

Claims 30 and 39 were rejected under §102(e) as anticipated by Crocker. This rejection is traversed, as Crocker does not disclose "sending the connection failure cause and geographic area to a wireless network". The Examiner's citation to paragraphs 27 and 33 is misplaced, as those paragraphs disclose at most determining a connection failure cause and geographic area, but not sending such data to a wireless network.

Applicants further traverse the objections to claims 31-32 and 40-41, as those objections have been obviated by these comments.

Applicants note that at the time of the invention, the subject matter and the claimed invention were commonly owned. *See*, 35 U.S.C. §103(c).

Applicants thank the Examiner for the noted allowability of claims 24-29, 33-38 and 42.

Withdrawal of all rejections and objections is requested.
